A Message From Our MD

Our journey in the electrical power sector over the last 25 years has been one of steady growth paired with a diverse portfolio of experience. This would not have been possible without the dedication of our team, the support of our business partners and the trust that has been given to us by our clients. Ever since the company was founded in 1995, our governing philosophy has always remained the same — to “deliver as promised without cutting any corners”.

Over the years, this philosophy has enabled us to form a sense of trust in the public that is unique to the KMN brand. From distributing reconditioned Japanese machines and electrical products in our early stages, to playing a significant role in providing power to Myanmar people in the present day, we have consistently challenged ourselves to see what more we can offer to all stakeholders in the country.

For a developing nation like Myanmar, power infrastructure is one of the most important pillars of growth. It gives us a great sense of pride to play a vital role in electrifying cities, industrial zones, and residential and commercial buildings, with the purpose of fostering growth and vitality for the economy.

We envision Myanmar’s power landscape to be built upon innovative technology, and ethical and sustainable business practices. For those with similar ambitions as us, I would like to welcome all local and international partners to join us in powering change throughout Myanmar.

The Khin Maung Nyunt Group of Companies will strive to become a stronger, more adaptive and leaner organization in the years to come. It is our promise to continue innovating our management practices, developing our human capital and advancing our technology to best serve the needs of all of our stakeholders.
